

KOUSHIK CHALLA

+91 7842661256 | koushikchalla999@gmail.com | github.com/challa-koushik | linkedin.com/in/koushik-challa
Full-Stack Web Developer | B.Tech CSE, SRM University AP (2028)

EDUCATION

B.Tech, Computer Science Engineering — SRM University AP, Amaravati	2024 – 2028 (Present)
• CGPA: 9.12 / 10.00	
• Relevant Coursework: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Gen AI, Machine Learning Basics, Algorithm Design	
Intermediate (Class XII) — Sri Viveka Junior College, Kandukur	2024 984/1000 (98.4)
Secondary School (Class X) — Sri Chaitanya Techno High School	2022 569/600 (94.8)

EXPERIENCE

Web Development Intern — ShadowFox	2024
• Built responsive frontend applications using HTML, CSS, and JavaScript; improved UI consistency and cross-browser compatibility.	
AI / Generative AI Intern — Infosys Springboard	Expected May 2026
• Selected for internship covering Generative AI, prompt engineering, and applied ML workflows.	

PROJECTS

Apartment Maintenance & Billing Portal — MERN Stack	2025	Project Link
• Developed a full-stack apartment management system with role-based access control (Admin/Resident).		
• Built 20+ REST API endpoints with MongoDB Atlas integration using Mongoose; implemented modules for invoices, complaints, notices, and payments.		
• Implemented real-world features like complaint tracking, notice pinning, invoice validation, and persistent UI state.		
Infix to Postfix Simulator — C++ & Qt GUI	2025	Project Link
• Built an interactive Qt-based GUI application to visualize infix-to-postfix conversion using stack-based algorithms.		
• Implemented step-by-step simulation showing token processing, stack state, and output generation with operator precedence handling.		
• Added robust input validation, error handling, and modular architecture using QStack, QVector, and Qt Widgets.		
Dynamic Ride-Sharing Allocation — C + Web	2025	Project Link
• Implemented greedy nearest-neighbor algorithm for driver-rider matching to reduce simulated wait times.		
• Built frontend visualization using HTML/CSS/JS to display real-time allocation behavior.		
Mini Social Network — C	2024	Project Link
• Developed console-based social network with user creation, friend requests, messaging, and persistent file storage.		
• Implemented search features (by name, branch, hostel) and complete activity logging system.		

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript, React.js, Vite
Backend	Node.js, Express.js, REST APIs
Databases	MongoDB, MySQL, SQL
Languages	JavaScript, Python, C, C++, SQL
Tools & Practices	VS Code, Git, GitHub, Linux CLI
Concepts	Full-stack system design, DBMS, Data Structures

ACHIEVEMENTS & STRENGTHS

- MongoDB Certified Associate Developer — demonstrates strong proficiency in NoSQL database design and Mongoose integration.

CERTIFICATIONS

- Artificial Intelligence Foundation — Infosys Springboard
- Applied Generative AI — Infosys Springboard
